HAISICHUANG Furniture Series Products

海思创桌面、椅板系列产品采用零甲醛、高强度、耐老化的纤维水泥板为基材,设计风格极简自然,生产制作安装过程不含任何有毒、有害物质,公司产品通过了欧盟CE认证,是真正的新一代绿色环保产品。可根据客户需要制作办公会议桌、餐桌、宿舍书桌、户外公园椅等系列产品。

HAISICHUANG desktop and chair panel series products use fiber cement boards that are formaldehyde-free, high-strength, and aging-resistant as the base material. The design style is minimalist and natural. The production, manufacturing, and installation processes do not contain any toxic or harmful substances. The company's products have passed the EU CE certification and are truly a new generation of green and environmentally friendly products. They can be customized into office conference tables, dining tables, dormitory desks, outdoor park chairs and other series of products according to customer needs.

海思创桌面板一次性成型无拼接,可任意裁切,广泛应用于各类家具面板,常规厚度为12-15mm,通过不同饰面颜色的选用搭配,包含纯色、木纹、石纹及金属饰面等多个系列,为您打造美观、舒适的家居环境。  
 HAISICHUANG table tops are formed in one piece without splicing and can be cut arbitrarily. They are widely used in various furniture panels. The conventional thickness is 12-15mm. Through the selection and matching of different surface colors, including solid colors, wood grains, stone grains and metal finishes, etc., they creat a beautiful and comfortable home environment for you.

Note: The number of suction cups is configured according to the size of the HAISICHUANG desktop to ensure the stability of the overall table. The size of the suction cup is  $\Phi 34\text{mm}$ .

海思创户外公园椅具有良好的防水性能和耐久性，通常公园椅板厚度为20-25mm，板材密度大、孔隙率低，不透水性能良好，适合在湿度较高的环境中使用。同时具有硬度高、抗压强度好、抗冲击等特点，能够有效抵御外部风吹雨淋的侵蚀，即使长期暴露在室外环境中也能保持性能稳定。

HAISICHUANG outdoor park chairs have good waterproof performance and durability. Usually, the thickness of the park chair panel is 20-25mm. The board has high density, low porosity, and good water impermeability, making it suitable for use in high humidity environments. At the same time, it has the characteristics of high hardness, good compressive strength, and impact resistance, which can effectively resist the erosion of external wind and rain. Even if it is exposed to the outdoor environment for a long time, it can maintain stable performance.
